## DESCRIPTION ET EQUIPEMENTS

Under the hood you will find a 2500 cc 6 cylinders engine producing 95 hp. This engine is paired to a four-speed manual transaxle. The engine is fully overhauled and turns like new. The car is offered with FIA regularity passport. Alfa Romeo started with the production of its six-cylinder engine in 1925, but it was not introduced to the market until 1927. They continuously improved the technology of its engines. The six-cylinder engine was a great success in the thirties. Three chassis were delivered to the company 'Carrozzeria Touring', each chassis fitted with the strongest engine. The company had to design and to build a special body for the 'Mille Miglia'. Due to the World War 2 the event was cancelled. Instead, Alfa Romeo took part in a long-distance race in North Africa. (...)
